## SUMMARY

UI/UX developer with experience analyzing client requirements, creating wireframes and design concepts, and collaborating with cross-functional teams to deliver user-centered web and WordPress interfaces.

## TECHNICAL SKILLS

- Design - **Photoshop, Figma, Canva**
- Design Skills - **Wireframing, Prototyping, Client Requirement Analysis**
- **PHP & Angular** basics
- **Wordpress - Elementor**
- Web Development - **HTML, CSS, JavaScript, Bootstrap**
- **Version Control - Git & GitHub** basics

## EXPERIENCE

### Aatoon Solutions

Dec 2024 - Till Date

*Jr. UI UX Developer*

*Cochin Infopark, India*

- Analyzed client requirements and designed responsive, user-centered web pages and WordPress sites using Figma, HTML5, CSS3, SCSS, Bootstrap, Angular, and Elementor, ensuring brand consistency and mobile responsiveness.
- Created wireframes, homepage concepts, and visual assets (logos, posters) tailored to client needs, collaborating closely to align designs with brand identity.
- Collaborated with team members to review designs, incorporate corrections, and ensure accessibility and cross-browser compatibility for successful project delivery.

### Vismaya Max Studio [part-time]

Jan 2023 - Dec 2024

*Visual Designer*

*Kanyakumari, India*

- Created and edited visual content for print and digital media, including business cards and posters, and retouched and enhanced photos to meet client specifications.
- Utilized Photoshop and other tools for image manipulation, color correction, and layout design.

## PROJECTS

### Web Application | *Figma, Photoshop, HTML5, CSS3, SCSS, Bootstrap, Angular, Git*

- Analyzed requirements and designed selected UI pages in Figma, converting around 75+ application pages into responsive HTML/CSS.
- Ensured pixel-perfect, accessible, and cross-browser compatible frontend implementation.
- Collaborated with the Angular team to integrate templates and optimize performance.

### Websites | *Figma, Photoshop, WordPress, Elementor, CSS3, SCSS*

- Designed selected pages for some projects and full website interfaces for others in Figma, contributing to the overall visual direction and user experience.
- Converted 75+ design pages into fully responsive WordPress websites using Elementor, ensuring accurate implementation of UI designs.
- Customized CSS/SCSS stylesheets to achieve pixel-perfect design fidelity, maintain brand consistency, and ensure seamless responsiveness across devices.
- Optimized responsiveness and performance while enabling smooth handoff to content and development teams.

### Multi-Client Homepage Design Projects | *Figma, Photoshop*

- Analyzed client and industry requirements to design 15+ homepage layouts for client proposals across tech, energy, lifestyle, and legal services.
- Created high-fidelity UI designs in Figma, focusing on clean layout structures and brand alignment, adapting visual styles to suit different audiences and business goals.
- Delivered concept designs for client pitches and internal reviews, gathering feedback and iterating on designs; several were shortlisted, though not all approved or launched.
- Applied design best practices for accessibility, visual hierarchy, and responsive layout planning.

### Logo & Poster Design | *Figma, Photoshop*

- Designed logo concepts for clients, delivering polished final versions aligned with their brand identity.
- Created engaging digital and print posters for various events and social media campaigns to boost client visibility.
- Worked closely with clients to gather feedback and iterate on designs until final approval.

## EDUCATION

### Ponjesly College of Engineering

2019-2023

BE | CGPA:8.63

*Nagercoil, Tamil Nadu*

## CERTIFICATE

### Full stack Development Internship

Aug 2024

*Scope India with a support of Suffix E Solutions*
